

bellman_ford::predecessor_node

```
graph LR; A[bellman_ford::predecessor_node] --> B[edge::opposite]
```

A diagram showing a call to the `edge::opposite` method from the `bellman_ford::predecessor_node` class. The source class is in a gray box on the left, and the target method is in a white box on the right. A blue arrow points from the source to the target.

edge::opposite
